HEALTHCARE ADVISORY

Decision check for outpatient care

Seven review dimensions for market, product, investment and care-delivery decisions. The check does not create a cosmetic score; it exposes decision-relevant gaps.

Decision rule

One material open point can stop the decision, even when every other field is green.

Status	Meaning	Next step
2 · robust	Supported, current and decision-ready	Document residual risk
1 · partial	Plausible, but with a relevant gap	Validate the specific gap
0 · open	Unsupported or unresolved	Defer or label as a scenario decision

Version 2.0 · Stand 2 September 2026

01 · Decision question & mandate

Are decision owner, timing, alternatives, no-go criteria and intended outcome explicit?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

02 · Care-delivery reality

Are patient benefit, roles, process steps, time requirements and operational dependencies visible?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

03 · Regulation & reimbursement

Are accountability, reimbursement, authorisation, privacy and open legal questions understood?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

04 · Economics & adoption

Are market potential, realistic adoption, costs, incentives and provider burden assessed separately?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

05 · Evidence & data quality

Are source, data date, uncertainty, assumptions and missing information documented for each key claim?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

06 · Implementability & stakeholders

Are resources, accountabilities, conflicts of interest, acceptance and technical dependencies addressed?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

07 · Measurement & decision gates

Are success criteria, early indicators, stop criteria, review date and next decision defined?

Review status	2 · robust	1 · partial	0 · open
Selection	□	□	□

Evidence / assumption / open question:

_____

DECISION BRIEF

From review result to decision

Field	Your decision record
Decision in one sentence	
Recommended option	
Strongest evidence	
Critical assumption	
Material open point	
Patient / care-delivery effect	
Next decision and date	
Accountable owner	

Data protection

Do not include patient or health data, trade secrets or confidential documents in an initial enquiry. A suitable transfer route can be agreed after first contact.
